

# Do you have Parkinson's disease and are interested in advancing research?

---

You may be eligible for the Systemic Synuclein Sampling Study (s4) that aims to identify biomarkers (objective measurements) of Parkinson's disease. Biomarkers would help determine the effectiveness of therapies in slowing or stopping PD progression, and accelerate the pace of research.

## Systemic Synuclein Sampling Study

### You qualify for the study if ...

- > You are over the age of 40, and
- > Have Parkinson's disease

### What is involved if I participate?

- > Participants have 5-6 study visits over 6 months.
- > Study visits include tests and assessments and the collection of biological samples.

### Participant Resources:

- > Study procedures are provided at no charge.
- > Participants are reimbursed for travel to and from the site.
